

Casa Valentina Champions,

Casa Valentina opened its doors 14 years ago to youth who have aged out of foster care, or were otherwise at risk of being homeless. The sole purpose was to create an environment where these same youth could become self sufficient in their decision making and thrive into independent adults.

Despite the many challenges, the young adults at CV showed a desire, a resiliency, and a determination that is truly commendable.

At CV Our youth are challenged to think and are empowered to move forward through adversity and challenge with goals that they are held accountable to meet. COVID- 19 is just another challenge that residents, staff, and the CV community will conquer together.

We will continue to meet, now remotely, with residents as we guide them to success - with education and employment at the forefront. We made a commitment to our residents, and we will walk together through this difficult situation that we are all facing.

Our offices are open - and we are all making full use of our electronic devices.

Please continue to contact and support as you usually do, and we will make full use of all virtual tools so we can continue to connect.

Thank you for your continued support of our mission and work as we shepherd our youth into thriving independence.

Sincerely,

Janice M. Graham

Janice M. Graham
Executive Director
